

JAVA 8 FEATURES ASSIGNMENTS

1. *Given a list of integers, use a lambda expression to print all even numbers.*

Input : 1 2 3 4 5 6 7 8 9 10

Output : 2 4 6 8 10

2. *Sort a list of strings in alphabetical and reverse order using a lambda with **Collections.sort()**.*

Hint : Learn about Collections.

Input : "Banana", "Apple", "Mango", "Cherry"

Output : [Apple, Banana, Cherry, Mango]

3. *Given a list of names, use a lambda to **filter** and print names starting with 'A'.*

Input : "Alice", "Bob", "Andrew", "Tom", "Angela", "Steve"

Output : Alice Andrew Angela

4. *Use a lambda expression to **square** each element in a list of integers and print the results.*

Input : 1, 2, 3, 4, 5

Output : 1 4 9 16 25

5. *Convert a traditional anonymous class for **Comparator<Integer>** into a lambda expression for sorting numbers in descending order.*

Input : 5, 2, 8, 1, 9

Output : [9, 8, 5, 2, 1]

6. *Write a program to calculate a person's age from their date of birth using **Period**.*

Input : `LocalDate.of(1995, 5, 15);` // Example DOB

Output : Age is: 29 years 2 months 8 days

7. *Print the day of the week for a given date.*

Input : `LocalDate.of(2025, 12, 25);`

Output : Day of the week: THURSDAY

8: *Add 10 days and subtract 2 months from the current date*

Input : `LocalDate.now()` //Today date : 2025-07-23

Output :

Original Date: 2025-07-23

After adding 10 days: 2025-08-02

After subtracting 2 months: 2025-06-02
