

Spring JDBC Assignment:

1. Configure Spring Boot to connect to a MySQL database using **JDBC**.
2. Create a `DataSource` bean using application properties.
3. Implement a simple **DAO (Data Access Object)** class using `JdbcTemplate` to:
 - Insert data into a table.
 - Retrieve data from the table.

Instructions:

- Use `spring-boot-starter-jdbc` dependency.
- Set up the database connection in `application.properties`:

```
spring.datasource.url=jdbc:mysql://localhost:3306/your_db
spring.datasource.username=root
spring.datasource.password=your_password
spring.datasource.driver-class-name=com.mysql.cj.jdbc.Driver
```

4. Create using two schemas.(choice)
5. Create an entity class called `Student` with the following fields:
 - `id` (Primary key)
 - `name`
 - `email`
 - `department`
6. Annotate the class using JPA annotations like `@Entity`, `@Id`, `@GeneratedValue`, `@Column`. Use relationships using Hibernate
